

## TECHNICAL DATA SHEET

### WRP Board Defense

Document No.: WRP-TDS-002    Revision: 1.0    Issue Date: July 2026

### Product Description

WRP Board Defense is a borate-based wood preservative formulated to protect wood from wood-destroying fungi, termites, carpenter ants, powderpost beetles, and other wood-boring insects. It is an important preventative step in the WRP Wood Restoration System.

### Features & Benefits

- Borate-based preservative
- Helps prevent wood decay fungi
- Protects against termites and wood-destroying insects
- Penetrates unfinished wood
- Long-lasting protection when kept dry
- Interior and exterior applications

### Recommended Uses

Window sills, door frames, trim, fascia, soffits, porch columns, structural wood, replacement wood, historic restoration, and repaired wood.

### Surface Preparation

Remove loose paint, dirt and deteriorated wood. Clean the surface and allow the wood to dry before application.

### Application Instructions

1. Stir or mix if required.
2. Apply generously by brush or spray until the wood is thoroughly wetted.
3. Allow the product to penetrate and dry completely.
4. Continue with WRP Liquid Wood Consolidant and the remaining WRP repair system as needed.

### Technical Information

Property	Value
Product Type	Borate Wood Preservative
Active Ingredient	Disodium Octaborate Tetrahydrate
Appearance	White Crystalline Powder
Odor	Odorless
Application	Brush or Spray
Cleanup	Water
Storage	Store Dry
Shelf Life	Refer to Product Label

## Cleanup

Clean application equipment thoroughly with water immediately after use.

## Storage

Store in the original sealed container in a cool, dry location. Protect from moisture and keep the container tightly closed.

## Limitations

Apply only to unfinished or properly prepared wood. Protect treated wood from continuous water exposure.

## Safety Information

Read the WRP Board Defense Safety Data Sheet (SDS) before use. Wear appropriate personal protective equipment and follow all label instructions.

## Warranty

Information is believed accurate but users are responsible for determining product suitability for their application.
